

Data Analyst **NEW!**

Information Technology & Cyber Defense

Ready to unlock the potential of data? Join our Data Analyst program and build a career that turns numbers into insights!

This program prepares you to analyze and manage data in ways that drive business decisions. You'll gain hands-on experience with data collection, validation, and analysis, while mastering the tools needed to build and manage databases. Our expert instructors will teach you the essentials of data manipulation, reporting, and documentation, ensuring you can make data-driven recommendations to improve business efficiency.

Through practical training and real-world projects, you'll develop the skills needed to succeed as a data analyst. You'll learn to work with tools like SQL, Excel, Python, and Tableau, equipping you with the knowledge to manage and interpret data from multiple sources.
