

# Plumbing

## Architecture, HVAC & Construction

Gain the skills you need for a high-earning, in-demand trade that is flush with possibilities. Train for a career in Plumbing at Hennepin Tech!

The Plumbing program at Hennepin Tech prepares students to start a career as a plumber or pipefitter with a plumbing contractor. In this program, students learn important technical skills such as safety procedures, plumbing codes, using tools, reading blueprints, and installing plumbing systems.

Being a plumber has many benefits. It's a job with steady demand, so you'll always have work. Plus, as you gain experience, you can earn a good income. The work itself is varied and interesting, offering plenty of challenges to keep you engaged.
